

## Skaneateles Lake Report for FLRWA

January 2022

1. A major restoration project on Dowling Creek, a substantial tributary to Skaneateles Lake, was completed this fall. The SLA partnered in the project with the Skaneateles Country Club, through which the stream passes.
2. The SLA is undertaking a survey and treatment plan for Hemlock trees in the watershed that are infected with Hemlock Woolly Adelgid. Soil and Water of Onondaga County have completed a similar endeavor on public lands and the SLA will fill in the gaps on private property.
